ECONOMY

Jobs can be created, poverty can be tackled and economic development can be achieved. It can be done by taking control of the economy and not allowing vast sums of money to be taken out of the country each year in untaxed profits, debt repayments and overseas investments. Fianna Fáil, Fine Gael and the PDs making cuts at home and depending on multinationals to create jobs will not solve the crisis.

Sinn Féin demands:

- Profit Retention Tax.
- State fostering of selected industries.
- Major job-creation programme.

NEUTRALITY

Christy Burke and Tony O'Riadh will resist the erosion of neutrality through further integration with the European community and NATO.

THE NATIONAL QUESTION

Since its coming to power, the Fianna Fáil government has failed to stand up to Britain over the Birmingham Six, the Stalker cover-up and numerous other cases. Fianna Fáil's biggest U-turn came when it began extraditing Irish citizens to a discredited judicial system which even Mr Haughey has publicly condemned.

A vote for Sinn Féin is a vote against British rule in our country. It is a vote against extradition, for civil rights for all, an end to discrimination, and a real move towards peace.

Sinn Féin has published proposals for a peaceful path to unity in *A Scenario for Peace*.

Sinn Féin TDs will work for:

■ Constitutional guarantees for civil and religious liberties for everyone.

■ A constitutional conference — elected by the people of the 32 Counties — to determine the arrangements for a re-united Ireland.

■ A definite date for British withdrawal from the national territory.

NO EXTRADITION VOTE SINN FEIN
